## 108203A0330520\_演算法\_Algorithm

有直 我的課程 <u>108203A0330520\_演算法\_Algorithm</u> 作業 Assignments

performance evaluation for searching algorithms.

## performance evaluation for searching algorithms.

- Programming language: C++
- Benchmarks: recursive binary search, iterative binary search, hashing with chain, binary tree search, C++ built-in map, and C++ built-in unoredered\_map
- Data type is string with 6 characters.
- data sizes: 2000000,4000000,6000000,8000000,10000000
- searching 10000000 times
- running time is consisted of two parts: dictionary constructing time and searching time
- the experiment report includes:
- a. tile and author
- b. methodology
- b.1 benchmarks
- b.2 execution environment
- c. experiment result
- d. conclusion

## 繳交狀態

繳交狀態	已繳交,等待評分中
評分狀態	尚未評分
規定繳交時間	2020年 04月 24日(五) 00:00
剩餘時間	過期5 小時 40 分鐘才繳交作業
最後修改	2020年 04月 24日(五) 05:40
提交檔案	• <u> </u>

修改我已繳交的作業

更改你所繳交的作業
